PROJECTS

Portfolio Website using Stellar UI- Tech Stack: React.js, Tailwind CSS

- Designed and developed a fully responsive and animated portfolio website using Stellar UI, a modular UI system built on top of Tailwind CSS.
- Integrated interactive sections like project showcase, skill cards, and contact forms with smooth scroll and transition effects.
- Focused on accessibility and performance with optimized layouts and reusable components.
- Enhanced user engagement through subtle animations, hover effects, and a clean modern design.

Food Ordering Website- Tech Stack: React.js, Tailwind CSS, React Router, Lazy & Suspense

- Developed a fully responsive food ordering platform with categorized menus and real-time cart management.
- Implemented custom React hooks for data fetching and cart logic to promote code reusability and maintainability.
- Utilized React Lazy and Suspense to optimize performance by dynamically loading components like Menu, Cart, and Checkout.
- Designed an intuitive user interface using Tailwind CSS, ensuring seamless user experience across devices. Integrated routing with React Router for smooth navigation and enhanced modularity.
